How to make internal storage default

Continue

Most smartphones these days are launched with plenty of storage without an option to insert a microSD card. A few smartphone makers however allow users to expand storage using a microSD card - which is often necessary in budget devices that come with limited storage. In addition to files on your SD card, you can also use the card to store your apps and app data, and free up storage on your phone. It must be noted that not all Android devices allow you to move an installed app onto the SD card. Some apps also allow you to move only a small part to the SD card and the rest remains in the internal storage. If you are using a Huawei smartphone, you can follow the below steps to move your apps to SD card. Go to Settings on your phone. Click on ‘Memory and storage’ and then tap on ‘Default storage’. Now, choose SD card and allow the phone to reboot. Now, all apps reside on the SD card. See also: How to use Google calendar for birthday reminders How to use Google Maps offline and save mobile data Best Amazon Fire TV Stick tips and tricks: Get the most out of Fire TV Stick using these tips Great to make the world of gamers or streamers more beautiful and glamorous and we are providing eye-catchy logo, banner, panel, overlays, and unique overlays. Use SD card as default storage for installing apps Insert the SD card into the slot. Launch Settings. Navigate and Tap Storage. Check for the SD card. Click on it to set the SD card as the default storage place. From the Home screen, Tap File Browser open. Navigate and select Apps. Why can’t I set my SD card as default storage? Go to “Settings”, and then select “Storage & USB”. At the bottom of the list you should see the SD card’s details, including the option to format it and make it “Internal” storage. Once this is done, reboot the device and you can start running things from the card.Sep 20, 2019 How do I move apps to SD card on HTC Desire? Moving an app to the storage card From the Home screen, tap > Settings > Storage & USB. Tap Phone storage > Apps. Tap the app you want to move. Tap Change, and then tap the storage card name. Tap Move. How do I set my SD card as default storage for photos? Is it good to make SD card as default storage on phones and PCs? How to make SD default storage? Follow the MiniTool's post to figure out the reasons. By the way, if you want to format or back up your SD card, MiniTool Partition Wizard is worth trying. A large number of people want to expand the storage space on their phones and computers by using an SD card. It is possible to do that. However, before showing how to make SD card default storage on Android and Windows 10, please learn about the benefits you will get and the challenges you will face. Advantages of Making SD Card Default Storage 1. Expand storage In terms of phones, there are plenty of apps to be installed and massive videos and songs to be downloaded, which swallows the phone internal storage. Buying a new phone with large internal storage is a solution, but a large internal space means a high price. In terms of laptops, those with small eMMC or SSD will end up with low memory warnings within a few months. These drives are marked as 32GB or 64GB, but the available space is 2-4GB less than these specified numbers. Plus, the 32 or 64GB storage space will be split for other indispensable things: OS installation: it will take up 2-6 GB of space based on the OS version and build. Go here to learn about Windows 10 size. Windows update file: it will swallow another 6-12GB space. Windows Recovery Partition: it will consume another 4-6GB of space for system recovery files. 2. Save money Buying an SD card with a large capacity would be much cheaper than buying a new phone or a new hard drive. 3. Require little power Adding an SD card to your phone will not waste a lot of power as the SD card only requires very little power. Disadvantages of Making SD Card Default Storage 1. Apps are inaccessible after removing the SD card Some SD cards allow you to install apps on them, whereas you will find that all the apps disappear when you remove the SD card from the phone. Furthermore, the next time you insert the SD card into the phone, you might find that some apps are no longer accessible. 2. Not good performance SD cards are slower in reading and writing than the phone internal memory and PC hard drive, which is especially if you transfer some apps to a low-quality SD card — loading times, refresh rates, and sync speeds would decrease greatly. Running modern Android games is also not a good idea, although it is the best A1 Class 10 SD card, because it won’t perform enough fast for these games. Note: If the SD card you inserted into your Android phone does not perform well, your phone might prevent the SD card from being used as internal storage. Can You Run a Game from a USB Flash Drive? 3. Limited read-write cycles SD cards use flash memory that has a limited number of read-write cycles. In other words, SD cards will degrade gradually and fail finally. Remember, unlike HDDs, there might not be any signs of SD card failure. So, back up files in regular in case SD card failure is on the way. Here Are 6 Signs Indicating Hard Drive Failure, Check out Now How to Make SD Card Default Storage? Make SD Card Default Storage on Android Before making your SD card default storage on your Android phone, you should back up the SD card first if there are important files on the SD card. This due to the following operations will format and wipe the SD card. Here it is highly recommended that you try MiniTool Partition Wizard. With it, you can back up your SD card quickly and free. Free Download Step 1: Connect your SD card to your computer by using an SD card reader if there is no SD card slot on your computer. Step 2: Click the above button to download MiniTool Partition Wizard. After downloading, follow the on-screen instructions to install the program. Finally, launch it to access its main interface. Note: Your SD card should be on the main interface of MiniTool Partition Wizard. If not, hit F5 to load your SD card. Step 3: Start to back up your SD card. 1. Click the Copy Partition Wizard feature from the left panel. Tip: You can also choose the Copy Disk Wizard feature if you have a blank disk. 2. Click the Next button to continue. 3. Select your SD card from the disk list and then click the Next button. Then, choose an unallocated space then click Next. Note: If there is no unallocated space or it is not large enough to save data from the SD card, please try the Move/Resize Partition feature. 4. Edit the partition and then click the Finish button. 5. Click the Apply button on the main interface. The software begins to back up files from your SD card to the target partition. After backing up the data on your SD card, you can move to make your SD card default storage on your phone. The following tutorial shows you how to make SD card default storage on Android. Step 1: Insert your SD card into the SD card slot on the Android phone and wait for several seconds. Note: SD card slot on the phone has not died in 2020. There are still many excellent phones with microSD support, ranging from budget offerings to some top-tier flagships. Step 2: Go to Settings and Storage in order. You will see the name of your SD card. Tap it. Step 3: Tap the three vertical dots on the top right side of the phone screen and then tap Storage Settings. Step 4: Format the SD card as internal. Tap the Format as internal. Tap ERASE & FORMAT. Step 5: You will receive a notification saying “your SD card is slow”. Then, tap OK to continue. Step 6: Determine whether to move data from your phone to the SD card now or later. Step 7: Follow the on-screen instructions to complete this task. That’s all. The default storage of your phone will be your SD card. Things like photos, videos, and downloads will directly go to the storage device. Note: Once you set the SD card as default storage, the data on the storage device will be unreadable by any other devices as this card has been encrypted to its host device. Moreover, do not remove the SD card without using the Eject option. Make SD Card Default Storage on Windows 10 There are several steps to make SD card default storage on Windows 10. Scroll down to get the detailed tutorial. Step 1: Connect your SD card to your computer via the SD card slot or an SD card reader. Step 2: Format the SD card to NTFS if it has been formatted to other files systems like FAT32 or exFAT (Here are the differences among the three file systems). You can check the file system of the SD card and format it to NTFS via Disk Management or MiniTool Partition Wizard. # Use Disk Management Note: Do not forget to back up the SD card if there are some important files on it. Right-click the Windows icon on the taskbar and then choose Disk Management. Right-click the SD card on the Disk Management window and choose Format. Choose NTFS and click OK. Click OK again to confirm the operation. # Use MiniTool Partition Wizard You can also try MiniTool Partition Wizard that is regarded as one of the best SD card formatters. Free Download Launch the software and see if the SD card has been formatted to NTFS. If not, right-click the SD card and then choose Format Partition Wizard > NTFS > OK > Apply. Note: If the SD card uses FAT32, you can also try MiniTool Partition Wizard to convert FAT32 to NTFS without data loss. Step 3: Change Windows default save location to SD card. Windows 10 allows you to save files directly to SD cards. Click the Windows icon on the taskbar and then click the Settings Go to System > Storage. Move your mouse on the right side and scroll down until you find the Change where new content is saved, and lick it. Select the SD card to save documents, pictures, videos, or soothing else. Do not forget to click Apply to execute the change. How to make SD card default storage on phones and Windows 10 computers? If you have the same question, you can spend several minutes reading the post. It is helpful for me.Click to Tweet The End Have you set an SD card default storage on your Android phone or Windows 10 PC? Please give us your feedback. Have you tried MiniTool Partition Wizard to back up the SD card and format it? If you have some doubts about using the software, please send an email to and we will get back to you as soon as possible. How to Make SD Card Default Storage FAQ? How do I switch from internal storage to SD card? You just need to insert the SD card into the SD card slot on your phone and then activate the Format as internal option or other option like this. By doing this, the phone will recognize the SD card as internal storage. How do I automatically download to my SD card? You should set up the SD card on your phone or PC by formatting the SD card. Android phone users should format the SD card on phones to make it as internal storage. Windows 10 users need to format to NTFS and then set the SD card to save files like documents, videos, pictures, etc. Why can't I move apps to my SD card? It is a possibility that the apps you want to move to the SD card are running run in the background or handle important tasks on your phone throughout the day. So, you are not allowed to move them to other devices.
